# ABOUT BACKLINK GENERALIZATION

**It is so difficult to find a backlink tool that will help to increase the traffic to our websites, but there are a few options available to the industrious online marketer**

We typically make mistakes when we start investigating the online marketing and blogging industry. We believe that sharing via social media is enough to get links to your site.

*Why wouldn't it be enough?*

Well, unfortunately it is not. Even though keyword optimization is so important to a websites success it still does outweigh the backlinks that are connected to your website or blog. To receive an adequate amount of organic traffic to a webpage the page needs to be backlinked to a diverse amount of platforms and sites. So, being able to create backlinks from social media platforms, Web 2.0, document sites and anything else is a must for online success.

## WHAT OPTIONS?

**What options do I have to get backlinks for my website?**

There is a few options out there, so in this article I am going to go through three of my favorites. Then I will explain what they can do and if they are worth your time and investment. The programs I am reviewing are SocialMonkee which is a Web 2.0 builder, Backlink beast which automatic link diversity building platform and Easy Backlinks which is a fast, secure automation tool to submit content to the top Social Media sites. All these platforms work and all of them will help in getting more organic traffic to your pages. More traffic means more sales and more money in your pocket.

# SOCIALMONKEE

## SocialMonkee backlink tool for Web 2.0

Often we hear from many backlink building sites and online marketers the expression link juice. This simply means that backlinks not only work on your main earning site, but also the backlinks you have on your external sites. This gives your websites that extra juice and more traction and ranking in Google.

I have used SocialMonkee in the past and in my opinion it does have a proven link building record for creating Web 2.0 backlinks. As already mentioned it will not only backlink your site, but any backlinks that you already have to your pages. You can of course setup your own backlinks for free, but it is really boring work. Or you can outsource the work to someone else, which can get expensive.

As a online marketer myself, I do not like paying for anything that does not create an direct or indirect benefit or income for my business.

SocialMonkee on the other hand offers a really great solutions to the problem of link building as well as being quick and easy. Submitting your link to their system takes just a few minute and even faster if you use their free Firefox or Chrome Plugin. So regardless if you are building your own backlinks, SocialMonkee will be a time saving asset for your online business regardless of the product or service.

# BACKLINK BEAST

Backlink beast is the best way to get backlinks to your website safely

The main concept of Backlink beast's backlinking strategy is link diversity. Like most of us that work online, we understand the power of diversifying in our backlinks. In reality it is a must to diversify the type of backlinks we are using to rank our websites. The main difference with Backlink beast to the other programs on the market is that the automatic and hand free system gives the online marketer the time to work on other parts of their businesses.

**Backlink Beast automatically creates backlinks in thousands of platforms such as:**

- Social media platforms
- Web 2.0 article sites
- Social Bookmarking sites
- Document sharing platforms
- Press Release sites

This is just a short list of backlinking platforms Backlink beast will share your content with.

## Will Backlink Beast protect me against a Google site ban?

Well, they give you advice, which I am going to do for those of you using any form of backlinking program.

In simple terms, don't heavily backlink your main pages or earning sites. These pages should have strictly high quality backlinks such as a Youtube video or a related document connected to your site. This will protect it from being band by Google. The Quality backlink will act as a buffer and stop you from over-optimizing with too many exact keywords in the backlinks.

Even with the buffer sites and platforms, still do not start hitting them with a massive amount of backlinks. This means, that I am advising you to be smart.

# EASY BACKLINKS

## Use Easy Backlinks for building backlinks to your website fast

Easy Backlinks is a backlinking system that sees the value in social media. It is a fast and automated **backlink tool** that shares content with social media platforms such as Facebook and Twitter. The system also automatically engages with your followers creating an extra element to this system. So, regardless if you are a sole blogger or an online marketer Easy Backlinks will make it easy to submit your content automatically to the major social media platforms.

### Time is money

Another asset to using this system is the ability to log into multiple social networks at the same time. This means you can share posts and content in Facebook, Twitter, Pinterest and even blogging sites at the same time. In addition, you can schedule posts in advance with photos or videos attached.

There is only a few platforms that will give you the traffic-pulling, ranking juice as good as Easy Backlinks, because once you have got it started your campaign never sleeps.

## BACKLINK GENERATOR CONCLUSION

---

I cannot stress enough how important it has been to **get backlinks for my website** regarding online success. Once I realized that backlinks mattered some years ago I have striven to make my backlinks as diverse as possible. In my opinion, the best strategy is not to be too uniform in placing your backlink.
