DIGITAL NOMAD DREAM

**IT WAS A DREAM OF MINE EVER SINCE THE CONCEPT OF WORKING ONLINE CAME INTO EXISTENCE. THE IDEA THAT I COULD BE ONLINE AND REMOTE NOMAD WORKING WHEREVER I PLEASED WAS INTOXICATING**

I was doing a dead end job with no prospect to be more than I was. Life had become a drag and my only rest bite was the weekend when I could let off steam. My first touch with internet marketing was in the early days of the internet. None of us really knew what we were doing, but as long as we offered value and shared our product everywhere we could make enough money. I recall joining a network marketing business and sharing everything online with great results and the phone call from the company strongly suggesting to stop running the business online. Fortunately, for the internet nomad things have change and most of the better network marketing and direct sales companies allow digital, internet and social media marketing. This gives people like myself to live and work wherever we want and gain the benefits of working a few hours a day as long as we have a WIFI connection and a laptop.

There are various names for this profession, but internet or digital nomad are the most common. However, I have even heard virtual nomad used a few times.

The main definition is that we work on the internet, while using digital methods and travel at the same time. We may stay at one destination for longer than normal, but the point is to enjoy new experiences while making money. I have found that I return to places that worked for me in the past. For me, this is an amazing way of living where we can be financially independent while travelling the world.
