ARE YOU USING FREE BACKLINKS SITES FOR AUTOMATING SOCIAL MEDIA?

I have been using a free social media sharing platform for sometime, but never felt until now that I should write my own SocialAdr review outlaying why you should be using this free platform

To get started, the main thing I like about SocialAdr that the idea is so simply and even simpler to use. Many backlinking and sharing programs are just too complex and needy for something that we want to be quick and effective. SocialAdr lets the user set everything up and then get on with their day without too much fuss.

So, what does SocialAdr basically do?

It mainly builds backlinks via social bookmarking sites such as APSense, Plurk and Instapaper. I believed originally that this method would not be adequate enough to influence my sites ranking or traffic, but how wrong can you be. Of course, there is always the risk of being penalized by Google, but because the links are submitted by real people there is no footprint for the user. This is great, because in a very short amount of time you will see an increase in traffic on the webpage you are promoting.

How does the SocialAdr bulk backlink generator work?

If I put it simply, you add your website to the service and hundreds of real people share your site onto their real and unique social media platforms. At the same time you share and bookmark their websites to your social media platforms.

That is it and by the way, it really works!

Do free link building sites only offer low-quality backlinks?

Yes, that is true

That was the main reason why I have written a SocialAdr review to analysis weather my webpages were benefiting from my time and effort. Even though I had felt that SocialAdr was beneficial to my websites I had not really tracked them closely in the past.

WHAT DID I FIND DURING MY SOCIALADR REVIEW?

WHAT DID I FIND DURING MY SOCIALADR REVIEW?

Firstly, I have created a fair and honest review so I could not only see the results for myself, but also the readers of this article. I wanted to understand if SocialAdr was going to be an effective SEO tool or was it going to be a lot of time and energy wasted.

My main method was to only use SocialAdr. I mean after setting up the website and indexing it with Google and Bing. Then my only marketing method would be using the SocialAdr platform. Previously, I would share a new website with social media platforms manually, but this time I didn't.

What was the result?

After a few days I noticed a slight increase in traffic. Then a large kick which was very positive. As the months went on, I noticed a very positive increase in traffic which started to deliver the results I was looking for.

WHY WOULD AN ONLINE MARKETER WANT TO USE A AUTOMATING SOCIAL MEDIA SHARING TOOL LIKE SOCIALADR?

There is a few other platforms around such as OnlyWire, but OnlyWire does not have a free version (only a free trial). However, the main reason for using such platforms is to backlink your websites and receive more traffic and make more money.

So, when we bookmark a website we are saying that we like what you are offering and would like to return in the future. Of course, we could do this organically and allow anyone to bookmark our webpage, but that is easier said than done. The main issue is finding people to bookmark your websites, beyond your family and friends. SocialAdr allows you to expand on that theory, by allowing others outside your social circle to bookmark your websites. This is the main reason why online marketers like myself use SocialAdr as a part of our marketing strategy.

In conversation about my SocialAdr review

One of my affiliate partners was asking me about this program when he heard I was about to do a SocialAdr review. I explained that it is a unique program that allows us to create an online team effort with people we don't know. We all have one thing in common. We want to share our website in the easiest way possible, rather than manually sharing.

I have tried other programs that promise the world with a limited lifespan and results. In some cases it meant being penalized by the search engines for using programs such as bot systems. Fortunately, SocialAdr has a human element which protects the user from such problems. Even though the concept is almost like an automating social media program the human factor stops it being so.

THERE ARE NOT MANY FREE BACKLINKS SITES THAT OFFER SUCH A LOT

THERE ARE NOT MANY FREE BACKLINKS SITES THAT OFFER SUCH A LOT

The free package is really good considering it is 100% free. However, there are multiply opportunities to upgrade or to purchase credits as and when needed. The upgrade is for those who are to lazy to bookmark website and simply want the benefits with the fuss.

For the FREE version users

There is a bit of work to do, but frankly it takes about 5 minutes if that. This means that if you want to share the your link on this platform you need to earn points or credits. And you get credits in two ways.

- Buy them by upgrading or simply buying some credits
- Bookmark other users webpages

If you want to start automating social media using SocialAdr and read the rest of this article click on the source link below below.
